Better Way

1) There is a better way, To cool the planet;
And slow formation, Of C 0 2.
There is a better way, cleaner way, cooler way, To slow the burning;
And keep the seas at bay, For generations.
Let's take the first steps toward a cooler world.

2) There is a better way, To heal the planet;
And grow our food, To save the soil.
There is a better way, kinder way, gentle way, With land and water.
The earth is calling out, For our attention.
Let's keep the oceans clean, And love this land.

To cool the world, And love God's Earth; There is a gentle way.
To love God's Earth, And save the soil; There is a kinder way.

3) There is a better way, To treat our brother;
And help him live, Without despair.
There is a better way, kinder way, fairer way, To work together.
It will take all of us, From every nation.
With all that earth provides; Let's learn to share.

4) There is a better way, To treat our sister;
There is a better way, To make her safe.
There is a better way, kinder way, gentle way, To live together.
It will take all of us, From every nation.
Let's make her freedom our priority.

5) There is a better way, To make this happen.
It will not happen, With status quo.
There is a better way, better way, better way, Will you come join in?
It will take all of us, From every nation.
We share a common world; A common goal.

To share the world, And love God's Earth; There is a better way.
To live in peace, And have enough; There is a fairer way.

To cool the world, And save the soil; There is a gentle way.
To love God's Earth, And share the world; There is a better way.
